

SMS Agent Consent Script

Verbal opt-in procedure for admissions staff

Version 1.0 — Effective September 30, 2026 — Permanent URL: <https://buenavistarecovery.com/sms-consent-script.pdf>

Purpose

This document describes how Buena Vista Recovery admissions representatives obtain, record and honor a caller's express consent to receive SMS, MMS or RCS text messages. It is published so that our messaging providers (CallTrackingMetrics and Twilio) and their carrier partners can verify our opt-in process. It supplements the SMS section of our Privacy Policy at <https://buenavistarecovery.com/privacy-policy/> and our Terms of Use at <https://buenavistarecovery.com/terms-of-use/>.

When to use this script

Read the script verbatim during any phone call in which the caller has given us a mobile phone number and a text message would be useful, for example to send admissions paperwork, appointment reminders, insurance verification updates, directions to a facility, or program information. Read it every time; do not assume consent from a previous call, a web form, or a family member.

The script (read verbatim)

"Would you like to receive texts from Buena Vista Recovery? Message frequency varies. Message and data rates may apply. You can reply STOP at any time to opt out."

Rules the agent must follow

- Consent is optional. Never state or imply that agreeing to texts is required to speak with us, be assessed, verify insurance, or be admitted. If the caller declines, continue the call normally and do not ask again during that call.
- Consent must be a clear "yes" from the person who owns or uses the phone number. A family member or friend cannot consent on behalf of the prospective patient, and the prospective patient cannot consent on behalf of a family member.
- Confirm the number. Repeat the mobile number back to the caller before recording consent.
- Do not add, remove or reorder the four elements of the script: the request, message frequency, message and data rates, and how to opt out (STOP). Each is a carrier requirement.
- Never read the script to a caller who has previously replied STOP unless they explicitly ask, in

their own words, to receive texts again.

Recording the consent

Immediately after the caller says yes, record the following in the caller's CallTrackingMetrics contact record (custom field consent_sms = yes) or, if the record cannot be updated during the call, in the call notes so it can be entered afterwards:

- Date and time of the call and the agent's name.
- The mobile phone number that consent applies to.
- Method of consent: "Verbal — SMS Agent Consent Script v1.0".
- The caller's answer (yes / no). A "no" is recorded too, so the number is not asked again unnecessarily.

Where the call is recorded, the recording is retained under our normal call-recording retention schedule and serves as the proof of consent. Consent records are kept for as long as we message the number and for at least four years after the last message.

Confirmation message

After a verbal opt-in, the first text sent to the number is a confirmation that restates the key disclosures, for example:

"Buena Vista Recovery: Thanks for opting in to texts. Msg frequency varies. Msg & data rates may apply. Reply HELP for help, STOP to opt out."

Opting out and help

- STOP, STOPALL, UNSUBSCRIBE, CANCEL, END or QUIT received by text immediately removes the number from all SMS campaigns. One final confirmation message is sent and nothing further.
- HELP received by text returns our name, a contact phone number, and how to opt out.
- A caller may also revoke consent verbally or by email at any time. Agents must record the revocation in the contact record the same day and set consent_sms to no.

What we never do with mobile information

Mobile phone numbers and text messaging opt-in data are used only to send the messages the caller agreed to receive. No mobile information will be shared with third parties or affiliates for marketing or promotional purposes. Text messaging originator opt-in data and consent will not be shared with any third parties, other than the messaging service provider that delivers our messages on our behalf.

Web form opt-in (for reference)

Consent collected on buenavistarecovery.com uses a separate, optional, never pre-checked

checkbox with the following label: "By checking this box, you provide consent to receive informational and marketing SMS, MMS, or RCS messages from Buena Vista Recovery. Message frequency may vary. Message and data rates may apply. Reply HELP for help or STOP to opt out." The web consent and the verbal consent are recorded in the same consent_sms field.
